The Multi-arm Retractable Umbrella is provided with a revolutionary mechanism, unique in the world. Starting from now, one person can open and close all 4 umbrellas in one minute, using a centralized mechanism. You have the opportunity to act quickly under stormy and high wind conditions.

The umbrella is provided with a highly resistant aluminum structure, with a central pillar of 100 mm in diameter. The entire system can be easily mounted and dismounted. The covers and arms close completely around the central pillar, minimizing the space they occupy. If the umbrella is provided with gutters, they no longer should be disposed of in the process of shutting down.

The umbrella can be left out during the winter, protected by a cover bag, because it doesn't take much space.

The price includes the umbrella's metal base.

Equipped with telescopic system which easily allows opening and closing over tables and chairs. Waterproofed fabrics, guaranteed for use in all conditions. Intechangeable ribs sec. 18x36mm

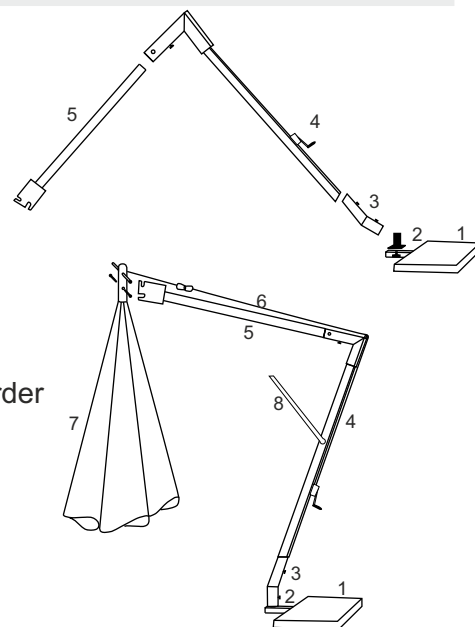

IMPORTANT TO KNOW

- 1) The umbrella covers: are standard; with a skirt for square and rectangular, without a skirt for round, unless otherwise requested. Colors are standard and ecru, unless otherwise requested.
- 2) All side arm umbrellas are easily installed, without the help of a ladder, with a screw key of 10, 13, 19 mm or adjustable. For the Poker umbrellas with 4-2 arms there is a need for a ladder of height ±2 m.
- 3) On request the bases and accessories made of iron will be pre galvanized, painted and provided with stainless steel screws (with cost adjustment).

SIDE ARM PARASOL MOUNTING

The mounting takes place in the following order:

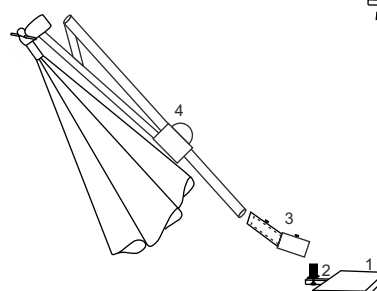

- The tub (2) is raised over the base (1). Then the pipe (3), with pole (3) and arm (5) are joined together . Together (5)-(4)-(3) are raised on the tube (2).
- Then take the umbrella, join the two cables and hook it on the top of the arm (5). The umbrella will then opened with the crank. There is a rib (8) on the pole (4). They have to be screwed together in order to give stability to the umbrella.

RETRACTABLE UMBRELLA MOUNTING

Mounting takes place in the following order:

- Tube (2) with base (1).
- The tube (3) is screwed on the pole (4) and together are raised on the tube (2). Tighten the screws that are already included on the tube (3).
